...Looking back through our history to find out who we are and how we work...

Who we are

“Wisdom is the daughter of Experience”

L. da Vinci

The past inspires us and experience strengthens and guides us when facing the daily challenges of an increasingly competitive and complex market.

This is how we plan for the future, drawing from our solid roots.

This is the strategic principle that has provided the essence of our Company since its foundation in 1972. It is part of our culture and determines the way in which we operate in the transport and logistics industry.

The experience gained through the years together with the commitment and passion of a highly competent team of people strengthen our identity every day and allows us to safeguard the principles: fairness, reliability and determination that direct our decisions and inspire our activities.

Our values

Our
values

Our
values

“It’s not hard to make decisions when you know what your values are”

R. Disney

A profound respect for our clients, a deep insight into their requirements and continuous research with the client for the excellence in the solutions provided are the pillars that inspire us and what we aspire to.

Through respect and transparency we lay the basis for long-standing relationships with our clients based on mutual trust and regard.

It is by listening to our clients and understanding their needs and objectives that we can provide efficient and tailored solutions.

Our passion for excellence pushes us to reach for increasingly competitive and challenging objectives. We invest in the continuous improvement of our Operating Processes in order to guarantee time optimization, cost reduction and the highest quality in the services provided.

Our philosophy

“The value of the result resides in the path followed to achieve it”

A. Einstein

This is the belief that has been guiding us since the beginning and is enshrined in all our activities.

Every decision, initiative and service is carried out with the objective of guaranteeing quality, safety and respect for the environment. All our efforts and investments are projected towards the future, and thus towards innovation. We define innovation as the need to understand market development, in order to anticipate requirements and devise ever more competitive and state of the art methods and solutions.

The application of our philosophy regarding quality, safeguarding of the environment and safety are demonstrated by the following:

- **Quality Management System Certification – UNI EN ISO 9001: 2000;** under these standards we guarantee competence, expertise and transparency in our services, through a process of continuous monitoring of internal and external systems.
- **Environment Management System Certification – UNI EN ISO 14001: 2004:**
 - preference is given as far as possible to equipment, machinery, materials and transport modes that are eco-friendly;
 - we apply technical and organizational solutions aimed at reducing all pollution sources at their origin and that reduce their impact on the environment;
 - we have put in place the necessary systems for the treatment/abatement of pollutants.

- **SQAS** audit for Chemicals and ADR goods transport. We have passed the audit and we are listed in the SQAS public register: www.sqas.org-transportservice <<http://www.sqas.org-transportservice>, which is an organization linked to CEFIC;
- we fully comply with the Italian law n. 626/94 regarding safety at the workplace and employees' health and safety.

Investments in innovation and the continuous improvement of the organization as a whole are also demonstrated by:

- the implementation of **Sestante**, a web-based tracking & tracing system for the monitoring of a series of operations in the supply chain. This technology allows us to offer ever more punctual, efficient and controlled services;
- being listed in the registers of key associations in the Transport sector such as FEDESPEDI, CONFINDUSTRIA (Confederation of Italian Industry) and AILOG;
- being a reputed agent of international organizations such as IATA and FIATA.

Our services

Transport and Logistics

We offer a complete and integrated range of transport and logistics services for the strategic development of the client's business based on the following points of excellence:

- a wealth of knowledge, experience and specific skills and competences;
- widespread presence in international markets through a close network of renowned and qualified partners;
- the use of state of the art technologies in order to optimise distribution processes and ensure accurate and continuous monitoring through each and every stage of the process.

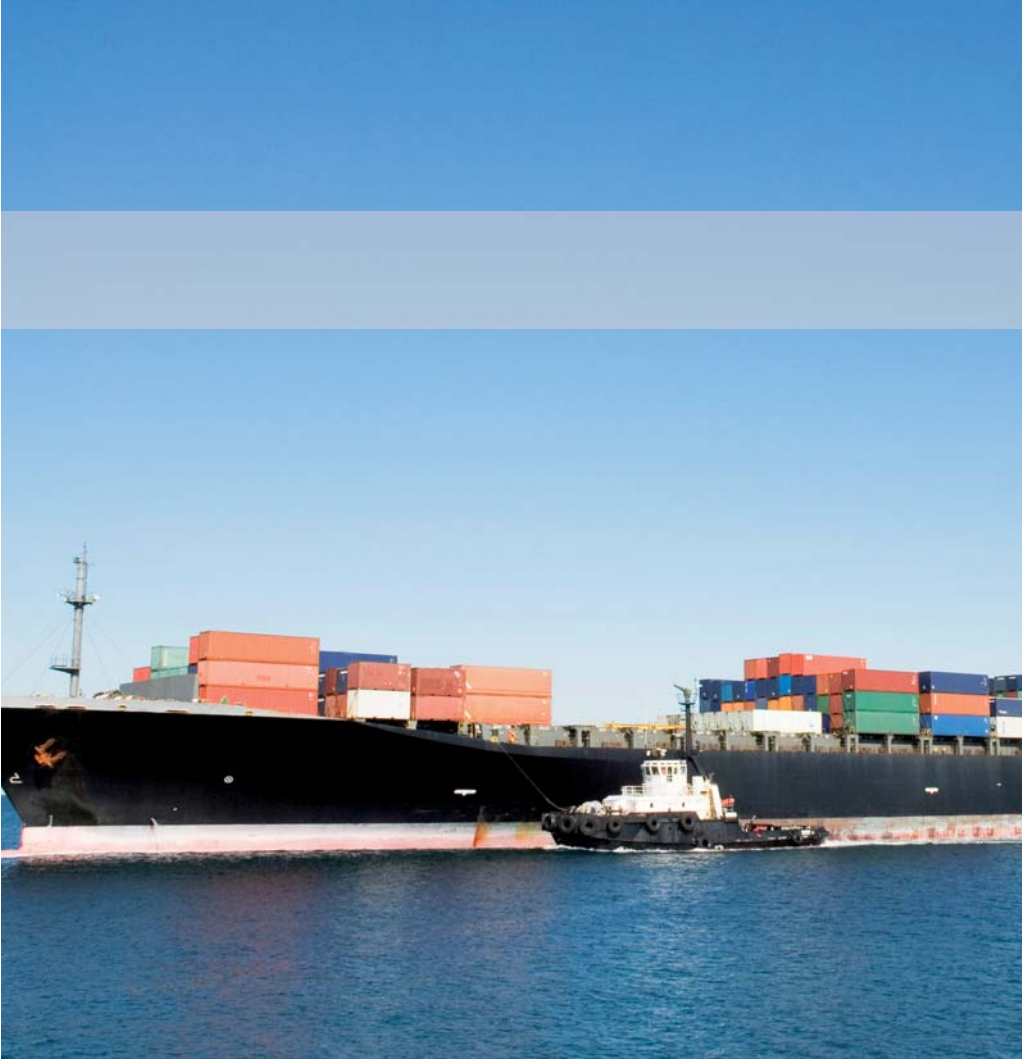

Stante Logistics mainly operates in the following sectors:

- Automotive
- White goods
- Chemicals
- Retail & Distribution
- Food Industry
- Trading Companies
- General Cargo

Road transport

- Groupage transports along main European routes;
- Domestic and International Partial and Full Truck Load Transports;
- ADR dangerous goods Transports
- Controlled Temperature Transports
- Special Exhibitions Transports
- Express Services
- Insurance
- Customs formalities clearance

Sea freight services

- Freight contracts;
- World-wide door-door FCL (Full Container Loads) shipments;
- World-wide door-door LCL (Less than Container Loads) groupage shipments;
- ADR dangerous goods container services
- Insurance
- Customs formalities clearance

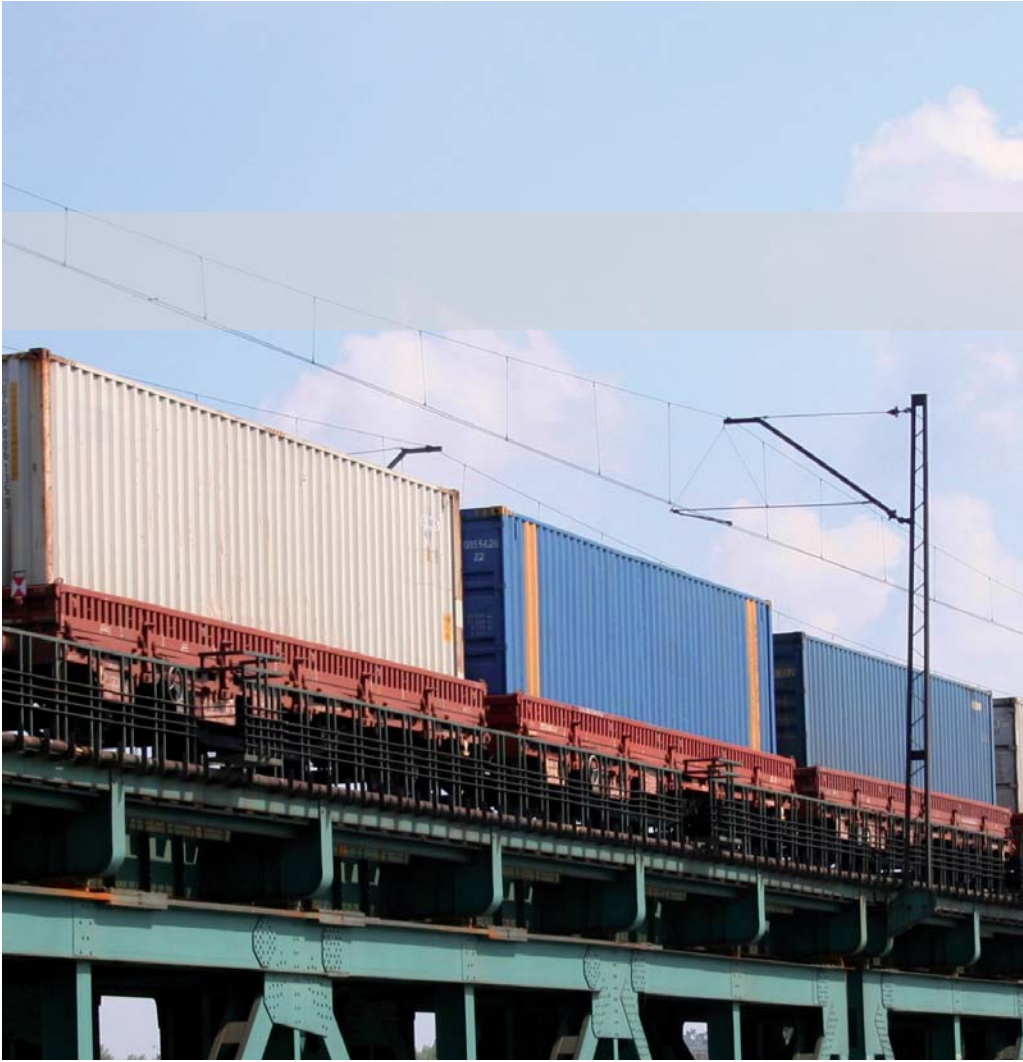

Air freight services

Stante Logistics is a credited IATA agent, and therefore we can offer our clients the following services:

- Air freighting contracts
- Full charter services
- World wide, door-door groupage services
- ADR dangerous goods transport services
- Insurance
- Customs formalities clearance

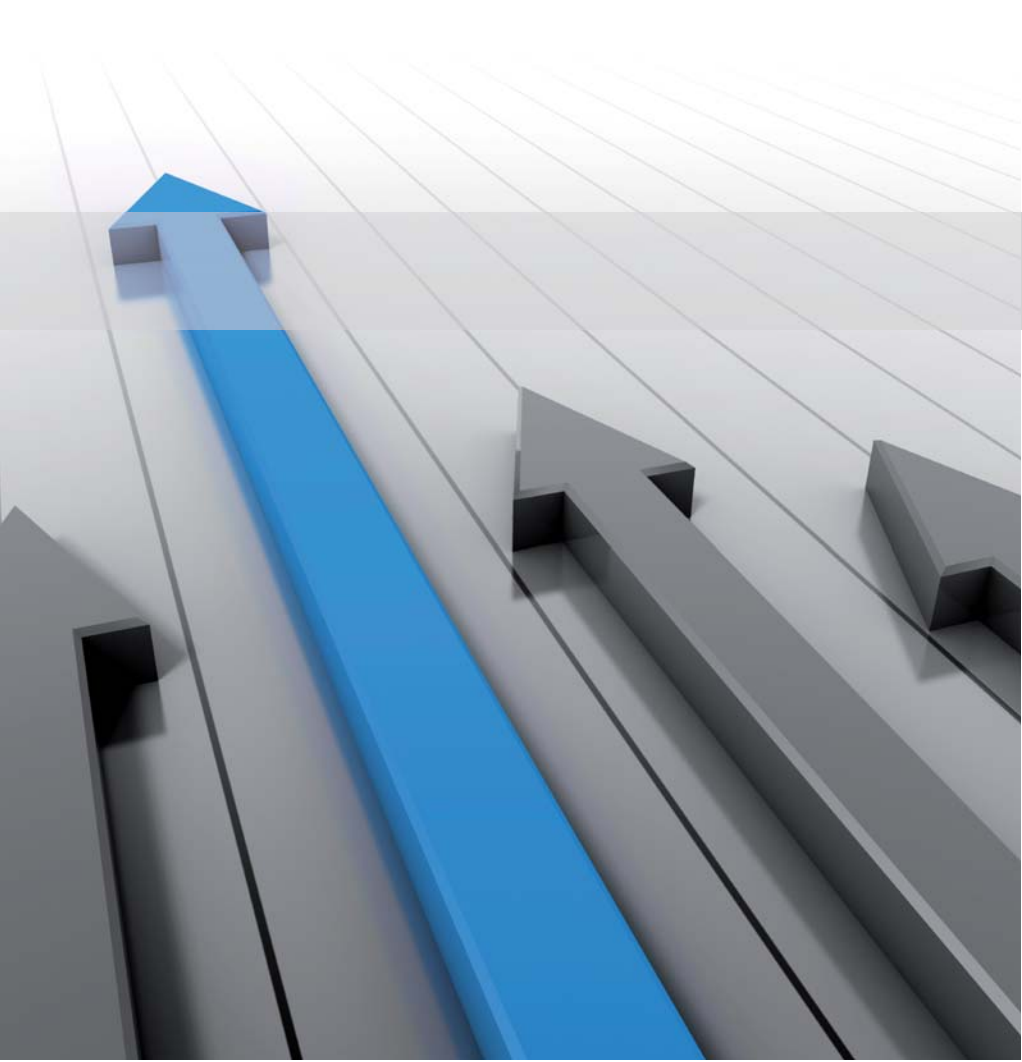

Intermodal transport services

Respect for the environment has always been a focal point for Stante Logistics, since its foundation. This is the reason why, in the last 10 years, we have been strengthening the use of Intermodality (road/rail and road/short sea) in the Company.

This choice derives not only from an increased sensitivity towards issues such as sustainable development, but also from our determination to offer state of the art solutions that are in line with market requirements.

Express services

Experience has taught us that we cannot always plan for everything, and we have to be ready to react to emergencies all the time. For this reason we have created a special Express Dedicated Services Department, so that we can guarantee your goods are delivered on time, speedily and reliably, 24h a day, 365 days a year.

The vehicles available at both domestic and international level are:

- Car: max capacity 500 kg
- Van: max capacity 1300 kg
- Truck: capacity from 3500 kg to 10.000 kg
- Trailer: max capacity 24.000 kg
- Airplanes with a range of capacities

Logistic services

We offer full support to our clients in devising strategies regarding their supply chain activities and we are devoted to developing customised, reliable and complete solutions tailored to their requirements.

Through our modern logistic terminals and a diffused distribution network we can implement and manage the complete logistic outsourcing process cycle in a highly competitive way, guaranteeing quick response, availability, reliability and flexibility at all times.

Our main activities in this area are:

- Warehouse management. This includes all internal logistic operations (stock management, storage, picking & packing)
- Transport planning and distribution line management
- After-Sales services (consulting services and customer care)
